

Creating a Trigger

1. Drag **Triggers** from diagram toolbar to diagram.
2. Name it.
3. Right click on the Triggers shape and select **New Trigger** from the popup menu.
4. Enter the physical name of the trigger.
5. Right click on the trigger and select **Open Specification...** from the popup menu.
6. Enter the **Create statement** of trigger.
7. Click **OK** to confirm editing.

Triggers and Stored Procedures

A stored procedure is a pre-written procedure code that allows you to execute over and over again for validation or quick retrieval of data.
