

Expanded List of Open-Source and Commercial Database Backup Tools

September 1, 2025

Here's a list of database backup tools that support multiple database management systems (DBMS), categorized into open-source and commercial solutions:

Open-Source Database Backup Tools

1. **Barman** – Backup and Recovery Manager for PostgreSQL.
2. **pgBackRest** – Reliable PostgreSQL backup and restore solution.
3. **pg_probackup** – Fork of pgBackRest with incremental backup, PITR, and parallelism.
4. **wal-g** – Successor to WAL-E, supports streaming WAL archiving and cloud storage (S3, GCS, Azure).
5. **MyDumper / MyLoader** – High-performance logical backup and restore with parallel export/import.
6. **MariaBackup** – Fork of Percona XtraBackup tailored for MariaDB with hot backup support.
7. **mydba** – Lightweight community scripts for consistent snapshots with minimal downtime.
8. **mongodump / mongorestore** – Official utilities for logical backups and restores.
9. **Kopia** – Deduplicating backup tool with encryption, supports integration with databases.
10. **BorgBackup (Borg)** – Efficient deduplicating backup system, often paired with DB dump scripts.
11. **Rclone** – Syncs DB dumps to cloud storage, widely used for offsite backup.
12. **Bareos** – Fork of Bacula, community-driven with extended database plugins.
13. **Velero** – Kubernetes-native backup and restore, useful for stateful DB workloads.
14. **Stash by AppsCode** – Kubernetes backup operator supporting PostgreSQL, MySQL, MongoDB, Elasticsearch, etc.

15. **Percona XtraBackup** – Open-source hot backup tool for MySQL, MariaDB.
16. **Duplicity** – Supports encrypted, incremental backups across multiple databases.
17. **Bacula** – Enterprise-grade backup system with database plugins.
18. **Restic** – Secure and efficient backup tool with support for MySQL, PostgreSQL, and more.
19. **Amanda** – Advanced Maryland Automatic Network Disk Archiver, Enterprise backup tool with support for MySQL, PostgreSQL.
20. **Dumper** – Simple tool for backing up MySQL, PostgreSQL, and MongoDB.
21. **AutoMySQLBackup** – Automated MySQL backup tool with rotation features.
22. **ClusterControl Backup Manager** – Open-source backup solution supporting MySQL, PostgreSQL, MongoDB.

Commercial Database Backup Tools

1. **Veeam Backup & Replication** – Supports SQL Server, PostgreSQL, Oracle, MySQL.
2. **Commvault** – Enterprise-grade backup and disaster recovery solution.
3. **Veritas NetBackup** – Supports multiple DBMS, including Oracle, SQL Server, PostgreSQL.
4. **IBM Spectrum Protect** – Scalable backup and recovery solution (formerly TSM).
5. **Acronis Cyber Protect** – Multi-DBMS backup and security tool.
6. **Rubrik** – Cloud and on-premises database backup for MySQL, PostgreSQL, Oracle.
7. **Arcserve UDP** – Comprehensive backup and disaster recovery for SQL Server, Oracle.
8. **Iperius Backup** – Supports SQL Server, MySQL, MariaDB, and PostgreSQL.
9. **N-able Cove Data Protection** – Cloud-based backup with database support.
10. **Quest Rapid Recovery** – Backup and disaster recovery for SQL Server, Oracle.
