

Defining a Primary Key (via specification)

1. Right-click on the candidate column.
2. Select **Open Specification...** from the popup menu.
3. Check **Include in Primary Key**.

The screenshot shows a dialog box for defining a primary key. The 'Include in Primary Key' checkbox is checked. Other options like 'Nullable', 'Unique', and 'Index' are unchecked. The 'Generated' dropdown is set to '<Unspecified>'. The 'Sync. to attribute' is set to 'Yes'. The 'DDL clauses' field is empty. The 'Description' field is empty. The 'Reset', 'OK', 'Cancel', 'Apply', and 'Help' buttons are at the bottom.

Defining a Primary Key (via specification)

1. Right-click on the candidate column.
2. Select **Open Specification...** from the popup menu.
3. Check **Include in Primary Key**.
4. Click **OK**.

The screenshot shows the same dialog box as before, but with the 'OK' button highlighted by a mouse cursor. The 'Include in Primary Key' checkbox is checked. Other options like 'Nullable', 'Unique', and 'Index' are unchecked. The 'Generated' dropdown is set to '<Unspecified>'. The 'Sync. to attribute' is set to 'Yes'. The 'DDL clauses' field is empty. The 'Description' field is empty. The 'Reset', 'OK', 'Cancel', 'Apply', and 'Help' buttons are at the bottom.
