

DBS - Lab 07: A ‘gentle’ Introduction to E-R Modelling.

			1	2	3	4	5	6	7	8	9	10	11	12
Criteria	Description	Points												
Entity-Relationship Diagram (ERD) Quality	ERD is complete, highly accurate, and visually clear. All entities, relationships, and attributes are correctly identified and represented.	30												
Cardinality & Constraints	All relationships clearly show correct cardinality (1:1, 1:N, N:M). Constraints (e.g., primary keys/unique attributes) are correctly implied and justified.	10												
Data Dictionary (DD) Completeness	DD provides detailed descriptions for all entities and their attributes. Includes clear definitions, data types, and permissible values/units where applicable.	20												
Analysis & Design Justification	The report provides a thorough discussion of the key aspects, clearly justifying the choice of entities, relationships, and cardinalities based on the scenario.	10												
Submission Guidelines & Deadline	Both PDF and SQL packaged into single ZIP file, submitted on time	5												
Report structure and clarity	Submit a well-structured and clear report in PDF format, ensuring readability and proper formatting.	5												
Lab Defense	Oral presentation or defense of the lab work, demonstrating understanding of concepts and decisions.	20
