Evaluation Criteria	Rationale	Assigned Weight							
Data Acquisition & Verification	Documentation of download mechanisms and data quality checks.	10							
Data Integrity & Format	Ensuring the data meets the requirements for ingestion into the database.	10							
Data Loading Efficiency	An explanation of the techniques used to handle large datasets.	25							
Brief Exploratory Data Analysis (EDA)	Highlights of the main statistics and characteristics of the available data.	10							
Reproducibility & Methodology	A clear explanation of how the required metrics were computed.	25							
Output Data Structure (Tables and Maps)	Presentation of the results using appropriate visualizations.	20
