

Lab 07: SQL Functions

			1	2	3	4	5	6	7	8	9	10	11	12
Criteria	Description	Points												
Function 1: Match Results	Function correctly returns match data for a specific league AND for all leagues (league_id = 0). The code is efficient, well-commented, and handles all parameters perfectly.	20												
Function 2: Player Ranking	Function correctly ranks the Top 10 players for a specific attribute AND for all numeric attributes. It correctly calculates the average for multiple entries. The code is efficient and well-commented.	20												
Code Explanation	The report provides a clear, detailed, and accurate step-by-step explanation of the logic and implementation of both SQL functions.	15												
Validation & Examples	The report includes multiple, clear examples of function calls with their corresponding outputs. The examples chosen effectively demonstrate that all requirements (e.g., all leagues, all attributes) have been met and validated.	15												
Submission Guidelines & Deadline	Both PDF and SQL packaged into single ZIP file, submitted on time	5												
Report structure and clarity	Submit a well-structured and clear report in PDF format, ensuring readability and proper formatting.	5												
Lab Defense	Oral presentation or defense of the lab work, demonstrating understanding of concepts and decisions.	20
